

**Exchange of experiences,  
building of alliances,  
development of new projects,  
and access to the latest trends  
for the energy sector**

Innov@arpel is a corporate web platform created with the aim of **promoting interaction among providers of innovative technological solutions** -R&D centers, universities, service providers, startups, SMEs, among others- **and end users** -operating companies in the energy sector, particularly oil, gas and biofuels operators.

Innov@arpel offers the possibility of **exchanging experiences** and knowledge, as well as obtaining **references of innovative technologies** already implemented by other users, therefore **accelerating the learning curve**. Similarly, it allows contacting other members that are developing new solutions.

On the other hand, the platform provides the opportunity **to carry out innovation projects together** with other stakeholders of the sector, and thus find a partner in Innov@arpel either to **obtain financing, scale a project, collaborate between teams** and enhance knowledge, among other possibilities.

Innov@arpel **brings together relevant information** on technological advances in one place, while it creates a **community of professionals in the energy sector** focusing on innovation.

#### ADVANTAGES FOR:

##### OPERATORS

- Massive and facilitated access to information on innovative technologies that already exist or are under development
- Start of contacts and building of alliances with other members
- Use of new technologies to improve competitiveness
- Networking and technical development of young professionals.

##### TECHNOLOGY PROVIDERS

- Regional and international projection of the business
- Interaction with operating companies, which represent over 90% of the upstream and downstream activities in Latin America and the Caribbean
- Knowledge of the needs of the industry

##### R&D CENTERS AND UNIVERSITIES

- Approach to the production sector
- Help to monetize R&D projects
- Publication of patents, papers, and other technical works
- Internships

We connect professionals in the energy sector, researchers and entrepreneurs in order to boost growth of the industry through the development of new technologies.

#### FUNCTIONALITIES:

##### OPPORTUNITIES FOR TECHNOLOGICAL PARTNERSHIP

The user can make a request for technological assistance to other companies or request partnering with other stakeholder in an innovation project.

##### FORUMS

The user can participate in existing forums or begin discussions on topics of his/her interest.

##### PUBLICATIONS

This section displays various documents, such as papers, manuals of products, services and equipment, patents, best practices, among others.

##### IN MAIL

The user can send private messages to other users through the portal. The user is also notified of new messages.

Through a corporate account, users have access to all the platform functionalities.

There are 3 types of accounts, depending on the number of users requested, thus meeting the needs of each organization.

In addition, there are specific benefits for ARPEL member companies and their R & D Centers, and for universities.

[www.innovarpel.org](http://www.innovarpel.org)

ARPEL is a non-profit association gathering oil, gas and biofuels sector companies and institutions in Latin America and the Caribbean. Founded in 1965 as a vehicle of cooperation and reciprocal assistance among sector companies, its main purpose is to actively contribute to industry integration and competitive growth, and to sustainable energy development in the region.

Its membership currently represents over 90% of the upstream and downstream activities in Latin America and the Caribbean and includes national and international operating companies, providers of technology, goods and services for the value chain, and national and international sector institutions.
