

NATURAL GAS STAKEHOLDERS' DIALOGUE SERIES

LATIN AMERICA AND THE CARIBBEAN 2025

ORGANIZERS

ASSOCIATION OF OIL, GAS AND RENEWABLE ENERGY COMPANIES OF LATIN AMERICA AND THE CARIBBEAN

INTERNATIONAL GAS UNION
UNION INTERNATIONALE DU GAZ

INSTITUTO ARGENTINO DEL PETROLEO Y DEL GAS

The Natural Gas Stakeholders' Dialogue Series is a platform for discussing the most relevant natural gas issues in Latin America and the Caribbean. It aims at finding the optimal pathways for natural gas development and creating understanding among key energy stakeholders in the region.

SEPTEMBER 8
2025

9:00 AM – 3:30 PM

Predio de La Sociedad Rural Argentina, Buenos Aires
ARGENTINA OIL & GAS EXPO (AOG) SIDE EVENT

WHY ATTEND

- Be part of the most current dialogue event on natural gas role in the region's energy systems
- Contribute to shape a White Paper summarizing the key opportunities for natural gas development to build sustainable energy systems
- Interact and network with key stakeholders

AUDIENCE

- Executives, high-level representatives and experts from Oil and Gas Companies, International Organizations, Multilateral Development Banks, Industry Associations, Governments, and Academia.
- This closed event is by invitation only and Chatham House Rules apply.

WHITE PAPER

The Stakeholders' Dialogue will be a key milestone in the elaboration of a White Paper on the opportunities for the development of natural gas in Latin America and the Caribbean. This document aims to establish a common, pragmatic, and coherent narrative for natural gas as a key enabler of sustainable energy systems and social development in the region.

This White Paper is a sequel to the document "**Natural Gas in the Transition to Low-Carbon Economies – The Case for Latin America and the Caribbean**," which was issued in 2023 as a joint effort among IGU, ARPEL, OLADE and counted on the support of the national gas associations of the region and other key stakeholders. This first document established a broad understanding of the role of natural gas in the region; it made a significant impact, and was presented in diverse fora around the globe as a contribution to the international energy dialogue.

AGENDA TOPICS

- General overview of Natural Gas markets, policies and development opportunities in the region.
- Regional integration opportunities in the Southern Cone.
- Natural gas for heavy transport.
- Natural gas as a backup for renewable energy development.
- LNG development opportunities for exports and energy security.
- Energy poverty and the vital role of natural gas.
- Tackling the methane emissions challenge.

About the Association of Oil, Gas and Renewable Energy Companies of Latin America and the Caribbean (Arpel)

Arpel is a non-profit association gathering oil, gas and renewable energy sector companies and institutions in Latin America and the Caribbean. Founded in 1965 as a vehicle of cooperation and reciprocal assistance among sector companies, its main purpose is to actively contribute to industry integration and competitive growth, and to sustainable energy development in the region.

Its members currently operate in more than 30 countries in Latin America and the Caribbean, including national and international operating companies; technology, goods and services providers for the value chain, and national and international institutions in the sector.

For more information, visit www.arpel.org

About the International Gas Union (IGU)

Founded in 1931 the International Gas Union (IGU) represents the global gas industry with more than 150 members in over 80 countries, covering over 90% of the global gas market. The working organisation of IGU covers the complete gas value chain, from the supply of natural and decarbonised gas, renewable gas and hydrogen, through their transmission and distribution, and all the way to the point of use.

As the global voice of gas, IGU seeks to improve the quality of life by advancing gas as a key contributor to a sustainable energy future.

About the Argentinean Oil & Gas Institute

The Argentinean Oil & Gas Institute (Instituto Argentino del Petróleo y del Gas, IAPG) is the technical benchmarker for the oil and gas industry in particular and energy in general of the country. It was established in June 1957 as a non-profit civil organization that creates, plans and performs studies and analysis of all of the activities related to the hydrocarbon industries.

The IAPG involves nearly all of the oil and gas industry-related companies doing business in Argentina.

Due to the fact that oil and gas industry activities are conducted in different regions all over the country, the IAPG has established seven section offices in the main producing areas of Argentina, along with its sister organization the IAPG Houston.

About the Latin American Energy Organization (OLADE)

Latin American Energy Organization (OLADE), is an intergovernmental public body of cooperation, coordination and technical advisory, established on November 2, 1973 by signing the Lima Agreement, ratified by 27 countries in Latin America and the Caribbean, with the fundamental objective of promoting the integration, conservation, rational use, commercialization and defense of the region's energy resources.
