Introduction

In the context of the energy transition, the Oil & Gas Industry in Latin America and the Caribbean faces the challenge of operating efficiently and sustainably to ensure competitiveness and energy security in its countries. In this context, digitalization is a strong catalyst to optimize operations and minimize adverse effects on the community and the environment. It is also about making a journey that involves significant challenges and makes the industry face and take new risks.

Regarding the use of digital tools and disruptive technologies in operations, the exchange of Best Practices, success cases and lessons learned is a factor that will contribute to this end and the mission given to ARPEL by its member companies.

Objectives

- Exchange best practices, success cases and lessons learned in the implementation and use of digital technology throughout our industry.
- How to avoid cyber-risks or mitigate the consequences that affect the organization's security and operations.
- Identify the challenges and opportunities involved in the Digital Transformation.
- Prepare the organization and its staff for the changes resulting from the Digital Transformation

Scope

The conferences will cover topics related to the Digital Transformation and its impact on the energy transition and the sustainability of the oil & gas industry in the region, as well as the opportunities and challenges that this transformation brings to the organizations.

In most of the conferences, the lecturers will share practical cases of the use of industry 4.0 disruptive technologies on our Upstream, Downstream and Midstream operations, such as IoT and IIoT, Analytics, Big Data, GIS, IA, Machine Learning, Robotics, Blockchain, etc. Moreover, one afternoon will be devoted to the topic of Industrial Cybersecurity as a critical cornerstone of Digital Transformation.

Target Audience

- Operating Managers throughout the value chain (Upstream, Midstream, Downstream); professionals from the operating companies involved in the digitalization of their organization; and users of digital tools.
- Professionals from companies supplying goods and services, digital solutions and cybersecurity solutions.

Registration

Category	Cost
ARPEL Members / Residents in Ecuador	USD 320
Non-members	USD 420
